Based in beautiful Kingston Ontario, Novari health designs, builds and implements enterprise scale software solutions that improves access to care for patients. Our cloud-based software platform includes a series of software modules like eReferral, virtual care, central intake and surgical wait list management. We are an award-winning Microsoft partner with a great reputation. Our growing team consists of software developers, clinicians, project managers, testers, customer support and others. We are an agile company that moves fast and has a growing client base across Ontario and Canada.

Our work environment is professional but casual. We stock our kitchen with unlimited coffee, tea, cold drinks and snacks. Many of us get together socially, which lately means over wings. We encourage continued education and Microsoft certifications. Our benefits package exceeds industry norms.

If you are a great developer looking for a fast paced, dynamic and professional environment where everyone is challenged and supported, then perhaps Novari Health is for you.

Description of Position: Full Stack Microsoft Developer

Duties:
As a developer you will work in a team environment delivering software solutions. You will:
- Design implement and test features for our products.
